Description

- Description

Description

The Pedego Interceptor is America's best selling electric bike. It combines beach cruiser comfort and style with breathtaking performance and user-friendly features.

Made for You

The first thing you notice when you ride an Interceptor is how comfortable you feel. You'll swear it was made just for you – because it was! The most important part of any Pedego is the person riding it, and the Interceptor is built with only one thing in mind: YOU.

User-Friendly

The Interceptor is fully loaded with user-friendly features that make riding even more fun. From the simple pleasure of a built-in bell, to innovative Smart Bike Technology including a bluetooth connected smartphone app; we've thought of everything!

Breathtaking Performance

What really sets the Interceptor apart is its supercharged performance. It's recognized worldwide as one of the most powerful electric bikes on the market, and it's just plain fun and exciting to ride.

Battery Motor

A state-of-the-art 48 Volt battery uses the same advanced lithium-ion cells as an electric car. It weighs less than a housecat and can take you up to 60 miles on about 10 cents worth of electricity.

A whisper quiet, 500 watt motor delivers best in class acceleration and hill climbing. The sensation of power it gives you is exhilarating. If-sealing tubes help prevent flats.
