## Description

- Description

### Montague: FIT

The FIT is built for club rides, fitness training, and long excursions on mountain roads. Tektro disc brakes, a carbon fiber fork, and 28mm tires position the FIT among the industry's best endurance road bikes. It folds in under 20 seconds without the use of tools, offering flexibility in today's multi-tasking world. It's a fast, sleek road bike that can maneuver around the city, and fold up to go aboard a train or bus for ultimate versatility.

#### Road Bike Performance

With the speed of a road bike, the versatility of a hybrid, and Montague's legendary folding bike frame, the FIT was created in order to provide the highest performance road ride of any foldable bike available.

#### Great For

- Long road rides.
- Getting to work on time.
- Weekend getaways.
- Getting in a workout.

#### The Essentials

- Speeds: 30
- Wheel Size: 700c

- Folded Size: 36"x28"x12"
- Approx Weight: 26lbs

#### Bike Sizing

- 19in Frame: For riders 5'3" – 5'10". Standover height is 28"
- 21in Frame: For riders 5'11" – 6'4". Standover height is 29"

#### • Features

DirectConnect Folding System

New for 2016 is the DirectConnect folding system, which removes the quick release from the top tube, provides an easier folding experience and larger clamping surface between the two halves of the...

Folding Integrated Technology

The FIT frame is designed around another patented system that allows the bike to fold without any breaks in the frame's tubing.

### Carbon Fiber Fork & Disc Brakes

A carbon blade fork reduces the weight of the FIT and makes for an even smoother ride by damping road vibrations.

### DirectConnect™ Folding system

New for 2016 is the DirectConnect folding system, which removes the quick release from the top tube, provides an easier folding experience and larger clamping surface between the two halves of the frame. A flip of the quick release lever and your bike folds to a compact size. [More...](#)

### Folding Integrated Technology

The FIT frame is designed around another patented system that allows the bike to fold without any breaks in the frame's tubing. Not only does this make it easier to fold, but it makes Montague bikes the strongest folding bike on the market. The Folding Integrated Technology (F.I.T.) is based around the same frame construction concepts as serious full suspension downhill bikes. [More...](#)

### Carbon Fiber Fork & Disc Brakes

A carbon blade fork reduces the weight of the FIT and makes for an even smoother ride by damping road vibrations. Combined with the stopping power and reliability of disc brakes, the FIT shines with unprecedented road performance.

### Reviews

"Own a sports car and wanted to be able to stow a full size bike in the back. That seemed impossible until I discovered the Montague FIT. This bike is worth every dollar and more. Carbon fork, narrow lightweight wheels and tires, FSA crankset all combine to make this a very fast, fun, responsive bike that happens to fold up to a medium size package. Pretty amazing customer service, Ryan and Jonathan of Montague Bikes answered every question I had about the bike...before and after purchase. My experience is that they very graciously treat every customer with sincere personal attention."

—Jeffrey Babcock, Oregon

"We bought two Montague FIT's last year. They are a joy to ride, great for day riding and touring, up-hill and down dale, however the real advantage is being able to pop them into a bag and put them into the boot and visit the Coast, the Dales or wherever."

—Michael P., United Kingdom

Specifications and prices subject to change without notice. Bike specifications and prices for your country may differ. We do our best to ensure that the listed specifications accurately reflect the parts found on our folding bikes. Even so, we may have to change the component specifications from time to time. We do our best to make sure that all component substitutions are of equal performance and cosmetics as those listed. Also our international distributors often ask us to modify components to better suit their local markets. Please contact your local distributor for information about bikes in your area.
